

## **RSM Workshop Read Ahead**

The upcoming RSM workshop will include a number of facilitated large group and small group discussion sessions, and we look forward to your participation in these discussions. Please think about the following questions prior to coming to the meeting. If you would like to provide written responses to any of the questions, we would welcome your written comments and you can provide these to Ty or Lynn at the workshop.

1. If RSM were successful, what would it look like? How could you tell it was successful? What would be happening in the Corps (districts, divisions, HQ) and other agencies?
2. If you were “RSM King/Queen for a Day” what three things would you decree to help RSM implementation?
3. What are the key elements of a “vision” for RSM?
4. What are the key obstacles to achieving success in RSM?
5. What are your “secrets of success” in doing RSM to date?
6. What policy improvements are needed to support RSM implementation?
7. What are useful measures of success to assess RSM implementation?
8. How can the RSM approach and experiences be communicated most effectively? Who are key constituencies that need to be reached?
9. How can funding requirements for RSM be presented most effectively?
10. What relationships (interagency and internal to the Corps) need to be cultivated for successful RSM?
